µC/LIB
V1.18

Release Notes

Revision History

Version	Date	Description
V1.18	2005 Sep	Bug fixes & improvements First version with release history
V1.17	2005 Jul	Improvements
V1.16	2005 Jun	Improvements
V1.15	2005 May	Improvements
V1.14	2005 Apr	Improvements
V1.13	2005 Feb	Improvements
V1.12	2004 Dec	Improvements
V1.11	2004 Nov	Improvements
V1.10	2004 Sep	Improvements
V1.00	2004 Feb	First release

Requires the following versions of needed Modules

Version 1.18
µC/CPU Version 1.12

Version 1.17
µC/CPU Version 1.12

Version 1.16
µC/CPU Version 1.12

New Features

Version 1.18

N/A

Improvements

Version 1.18
V1.18-001

Added macro function headers for all `lib_def.h` macros.

Changes

Version 1.18

V1.18-001

`DEF_BIT_MASK()` macro and `DEF_BIT_FIELD()` macro switched names.

V1.18-002

`Str_Char_R()` changed name to `Str_Char_Last()`.

Corrections

Version 1.18
V1.18-001

`Str_Str()` incorrectly assigned unsigned string lengths to signed variables. Corrected by assigning string lengths to unsigned variables.

Known Problems

Version 1.18
V1.18-001

`lib_mem.h` and `lib_str.h` include some standard library files and functions. ALL references to standard library files and functions SHOULD be removed once all custom library functions are implemented.

Limitations

001
Does not support variable argument library functions
